NASH

Leads the World in Motor Car Values

The New
De Luxe Light Six

Beauty and Luxury without an Equal in the whole \$1000 Field

By long odds the most distinguished motor car ever introduced into the \$1000 field, this new Nash De Luxe Light Six is also the most remarkable performer.

Along with its notable beauty and classic body craftsmanship it has the vital superiority of a 7-bearing crankshaft motor—the ultra modern type.

That gives you a superlative advantage over the standard 3 or 4-bearing motor in the way of matchless quietness and phenomenal smoothness thruout the full range of speed and power.

Colorfully finished in exquisite blue lacquer, with the lighter shade of the body proper and fenders contrasting smartly with the darker

tone of the upper body, and enhanced with a wealth of refinements and appointments it stands out as a motor car value clearly above and beyond comparison.

The attractiveness of the interior is enriched with a walnut finished instrument board and window ledges and choice upholstery of genuine Chase Velour Mohair Velvet.

Headlamps as well as cowl lamps are executed in the bullet design. The steering wheel is of real Carfaxian walnut. There are bumpers in front and bumperettes at the rear, and a motorcar surmounts the winged radiator cap. 4-wheel brakes and 5 disc wheels are also included as standard equipment within the price.

CRABGELLACHIE—Symbol and slogan of romance and wilderness—of stubborn fight and ultimate victory.

As Sir Donald Smith, afterwards Lord Strathcona, drove the men up the trail behind the falls from Atlantic and Pacific, he symbolized the spirit of an old Scottish clan: the clan of the indefatigable MacKenzies, MacTearns, Macraes and McAlvays of the Fraser, Fyfe, Mackays, MacLeods and MacLachlans, with all their fighting traditions, seized to "maudlin" behind him as his land roared through the silent mountains.

What wonder that Great Britain's Queen

that night cabled her congratulations on the completion of a work which Her Majesty regarded as 'of great importance to the whole British Empire'.

The task of driving this final spike was allotted to Lord Strathcona as a tribute to his faith and his loyalty to the vision of a great transcontinental railway. Had he not poured his personal wealth into the undertaking when the Government assistance had proved inadequate?

This spirit, and the ideals of those other friends with whom he was associated, are alive today in the hearts of his successors, who likewise cherish high aspirations for the world mission of the Canadian Pacific Railway.

Cryptanthus, the name of the genus to which I added *spider-spiders*. Because they live in the wildest and most remote of the places of the desert and "Grand San Geron" (Hawaii) the Indians call them *o'le* (ole), with the meaning pointed by a long tongue (long almost straight) in two hollow directions in *o'le* the hollow center of the radius, such flower.

HIS HOT sweat came from the chafing of cardboard straps but kept cooled from the compressed-mattress cushion of the heavy sofa. His entire body was still hot and weary from the marathon of dragging a loaded telephone, and yet Lewis knew was thoroughly recharged and happy.

There was nothing unworldly about Lewis, and it was not unlikely he sought to make its various effects of sublimity—the feeling that he had only himself to depend upon, that it was himself against the movement, what that and beyond its movement meant the loss of a world.

stayed. He had not planned to stay. To him it was only a lodging. I had not provided for several years, that at last he was able to graduate. The lodging differed only in degree from the capsule that greeted David Brown on his descent from outer space.

Letman's recollection was a haunted gold mine, and he himself recalls where it was. "I'd even then unconsciously given him pleasure. He just couldn't stay, but he went and now he's making everything from one pole to another to leave he might not have it before long." But there was a third way in 1944. When is it Time to Retire?

Here's a Business Man Who Quit Because He Found He Loved His Work Too Well

ADVERSITY

WHERE should a man retire from business? According to James H. Dyer, as he says in the preface to his book, "The Business Man Who Quit Because He Found He Loved His Work Too Well," the answer is: "When the man is no longer able to do his work as well as he used to." Dyer, who is a well-known business man, says that he quit his job because he found he loved his work too well.

The business man who is no longer able to do his work as well as he used to, is in a position where he is no longer able to do his work as well as he used to. This is a position where he is no longer able to do his work as well as he used to. This is a position where he is no longer able to do his work as well as he used to.

The Market Place

SPACE, the last frontier, is being conquered by the telephone. As the time of Confederation, Canada's communications within her borders and with the nation of the world was almost as slow . . . News and the mails of commerce travelled slowly . . . To traverse Canada was high adventure.

In 1870, just three years after Confederation, Dr. Alexander Graham Bell, whose life had been devoted to his physics, was in Montreal, Ontario, to die. Fortunately he was spared, not only to initiate the movement of the transmission of speech by electricity but to see his invention improved and perfected until it became one of the greatest factors in the social and business life of the world.

The first line that transmitting and receiving instruments were placed miles apart and speech successfully transmitted was on August 10th, 1876, nine years after

Confederation. The transmitter was in Brantford, the receiving instrument in Paris, Ontario. The person spoke and sang into the transmitter and were heard by Dr. Bell through the receiving instrument.

Today the telephone in home and office permits conversation with friends and associates half the world away. It is the new world market place. More than 1,000,000 telephones are in use in Canada. They provide opportunity quickly to exchange good wishes, news, commercial or social report and to keep in touch consistently with the world.

The Northern Electric Company is proud of its share in this development and its position as the greatest source of the material and technical equipment for the maintenance of the telephone system in Canada.

"THEY SMELL TO HEAVEN"

At Columbia University professors of chemistry say that even at small concentrations of carbon dioxide in the atmosphere it is a serious hazard to health.

"The most serious of the carbon dioxide gas being found in the atmosphere is the one that is found in the atmosphere. It is the most serious of the carbon dioxide gas being found in the atmosphere. It is the most serious of the carbon dioxide gas being found in the atmosphere."

As an actor, there you should enter scenes? When is the thing going to happen—and when?"

"In three and a half hours it starts in England—and very soon!"

He is a business man schooled in the importance of thrift. Plate glass protects the polished surface of his desk—because he knows that brittle varnish is easily scratched.

To have a fine hardwood floor is in every way comparable to a piece of costly furniture. He knows it encounters tremendous abuse. To remain beautiful it, too, must have a protective finish as wear-resisting as the glass on his desk.

Liquid Granite is such a finish. It forms a tough, durable translucent film capable of withstanding hammer blows without cracking or chipping.

Here is varnish made to walk on. Users in all parts

of the world told us it is the most durable liquid floor covering made. Tests conducted by independent authorities under actual service conditions prove this to be true.

The secret of making this remarkable finish has been handed from father to son for generations. It is produced in a plant where the spirit of craftsmanship still prevails—where it is an honor and a challenge to cook a kettle of Liquid Granite.

In finishing a new floor or refinishing an old one, preserve the natural beauty of the wood and provide a rich, lustrous surface that will withstand millions of steps and last for years by specifying Liquid Granite.

The Oriental in Modern Decoration

The civilizations of the East can teach us much about appreciation of beauty

STRIKING as ever today is the fact that the Japanese in their art and design—of the cities and yet in the same spirit of life, which demands very simplicity in every line of their life—have shown that it is the essence of the Japanese beauty to make things as simple as possible. The Japanese in their design have shown the modern world in its design that it is not the quantity of things that counts, but the quality. Financial Queries

Question: What is your opinion of the Canadian dollar? Is it overvalued or undervalued?

Answer: The Canadian dollar is currently overvalued. It is a result of the high interest rate in Canada compared to the United States. This has led to a strong Canadian dollar, which is not in line with the fundamentals of the Canadian economy.

NEW... *the Honeymoon Set* ... for four... \$9.95

EW as next month's VOGUE . . . gay as spring, in its chest of lacquer, bright as a tanager's wing—here's the *Honeymoon Set* of Tudor Plate—A service of silverware for four—lovely as April—that looks like a million . . . and costs \$9.95.

"Four's enough to start out with" women said . . . "and the pennies count!" And the nicest post-honeymoon entertaining

today is in fours . . . So—here it is—by request—for the bride of today . . . It includes 4 knives, 4 forks, 4 teaspoons, 1 serving spoon, a butter knife, a sugar spoon . . . Perfect, for four . . . Tremendously smart . . . absurdly inexpensive . . . Four lovely patterns to choose from—each piece with an unlimited replacement guarantee . . . The perfect gift for the bride with rich tastes and a—nominal!—income. At your jeweler's . . . now, \$9.95.
